Sovelto, Helsinki. Tailor made pods.

Sliding door, L-150 handle.

Spacious and brighter option

More glass offers more spacious meeting pod.

Laminated, sound insulating safety glasses:
Pilkington Optiphon 10,5Lp Rw39dB.

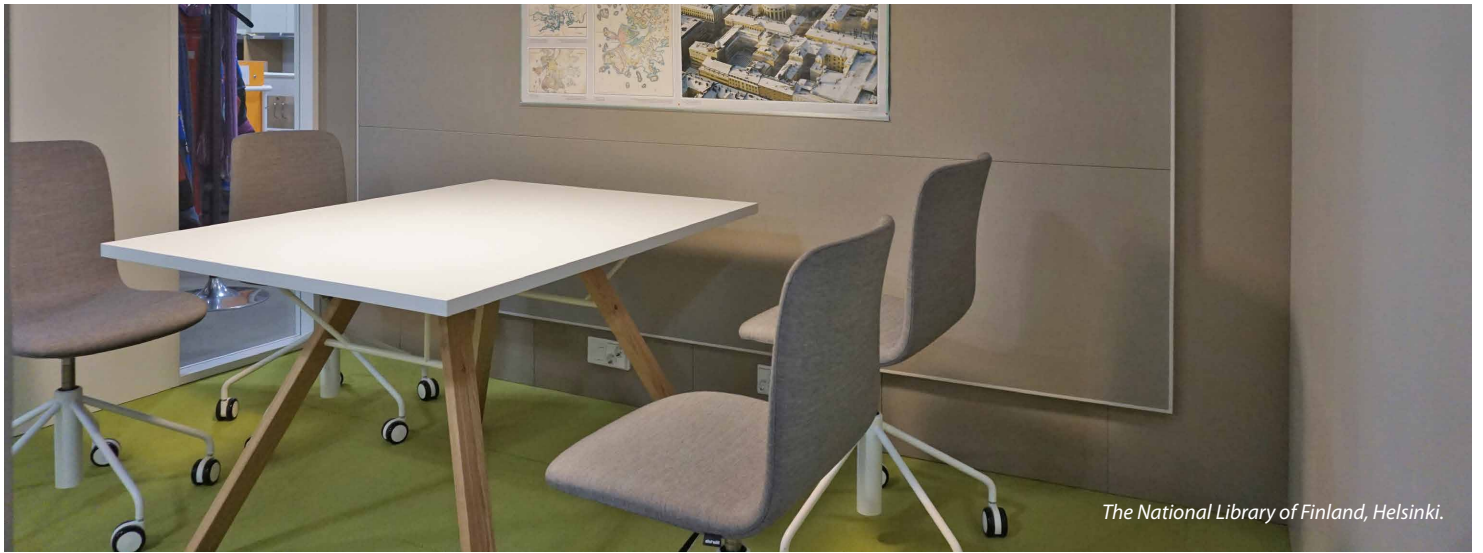

Glasses can be taped with various designs and colours.
Electrochromic smart glass (HSL DIM Glass) can be
solution for many glass walls as a special order.

*Veneered door with
with special order.*

Strong and stylish hinged doors

- Sound insulation: Rw37dB or Rw42db.
Door with the glass opening: Rw37
- Standard order include white, painted hinged door
- Standard order include standard handle
- Sliding doors: VTT's tested Rw37dB -structure
- Sliding doors. standard L-150 handle asstandard
- Allmost silent door movement with well working wheels

The National Library of Finland, Helsinki.

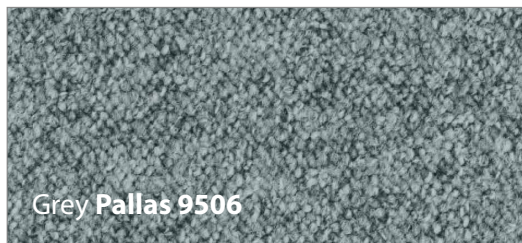

Easy care carpets

Floor is made of strong, 16 mm birch veneer panels.

Standard order include Desso Pallas -carpet. Three standard colors are Pallas 9533, 9506 and 8301.

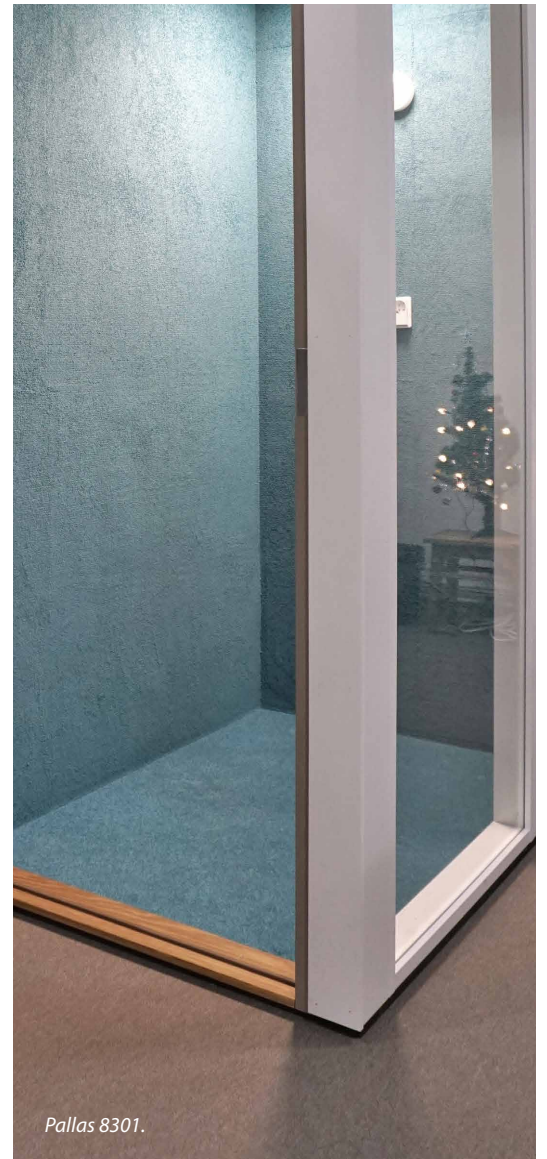

Dark Grey **Pallas 9533**

Grey **Pallas 9506**

Blue **Pallas 8301**

Pallas 8301.

*The National Library of Finland, Helsinki.
Door painted with special color.
Standard color: white, RAL 9010.*

*Full glass wall is made from the
safety glass that offers great
sound insulation: $R_w39\text{dB}$.*

Efficient air ventilation gives lots of fresh air to meeting pod

The ventilation unit is installed on the top of the meeting pod, but it can be left out if the pod is desired to be attached to the building's air ventilation system. The office phonebooth can change air 15–21 l/s, 54–76 m³/h. In office meeting pods the air capacity can be regulated between 30–150 l/s, 108–540 m³/h.

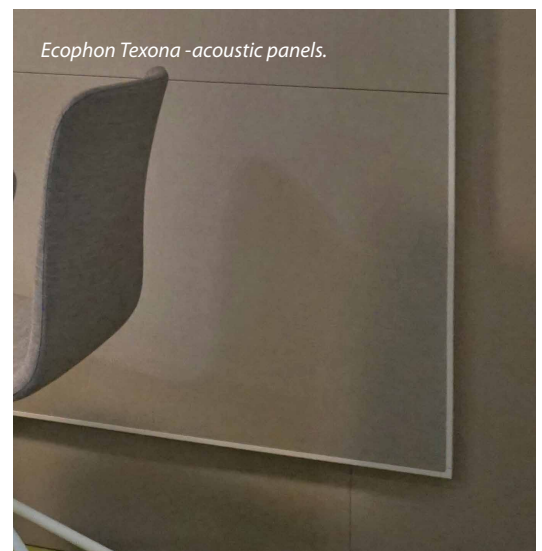

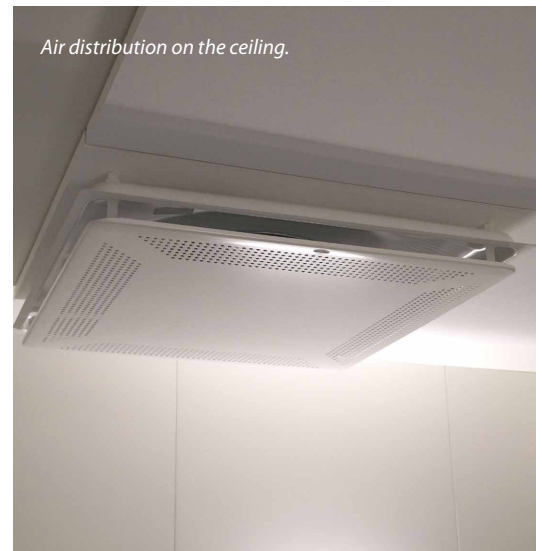

Often even a small space with its own ceiling, must be fire protected. In that case the most common way is to attach it to the building's sprinkler system. KIK is a ceiling or wall-mounted, circular, and non-see-through transfer air device. KIK dampens effectively the transmission of sounds from one room to another by using acoustic Dacron as dampening material.

Excellent sound proofing

Wall's acoustic panels: Exophon Texona.
Standard colors are Pepper ja Sea salt.

Ceiling are made with Ecophon Focus SQ20 600x600 and 600x1200 -panels. Standard color is natural white.

Energy efficient lightning

Phonebooth is delivered with iPlan´s energy efficient Family -light, which gives practical working light on the table.

Celiling light: iPlan Family, dimmable.
Color: white. Size: 30 x 30 cm.

Wall light: Led Store´s Wall Straight 300.
Color. brushed aluminium.
Size: 30 x 9 x 2,5 cm.

There is a ready made reservation for the ceiling light.

Pods can be delivered with motion detectors in a special order.

Electricity and data always nearby

- 230 v 50 Hz 10A (standard electricity)
- Phone booth delivered with two plugs.
- Meetin pods for two are delivered with four plugs.
- Meetin pods for four are delivered with six plugs.
- Two adsl-sockets as standard

Sovelto, Helsinki. Tailor made pods.

Our pods and booth represent smart and cost efficient choices.

Tailor made, combined space solutions

- Solid element walls modules are Rw37dB or 42dB and partition walls are Rw42dB
- Painted or veneered hinged door or aluminium framed sliding glass doors
- Laminated, sound insulating safety glasses: Pilkington Optiphon 10,5Lp Rw39dB
- Delivered with plug and play -air ventilation system or can be integrated to the building's own ventilation and air conditioning system
- Lights can be delivered with designer's specification
- Floor- and wall carpets can be chosen from Pallas Desso -collection with many different color options
- If necessary, the ceiling can be equipped with Ecophon Focus SQ20 acoustic panels
- If necessary, the walls can be equipped with Ecophon Texona -panels
- Electricity and data: 230 v 50 Hz 10A (standard electricity), adsl-sockets

Sovelto, Helsinki. Tailor made pods.
