HSL full glass walls

Full glass wall is a beautiful solution for many kinds properties. Abundant glass surfaces automatically bring spaciousness and lightness to the space. The aluminum profile surround the glass only from the top, down and if needed, from the side. Profiles are not needed in the middle of the glasses.

Glasses

The type of tempered safety glass will be used according to the need as the glass on the HSL full glass walls. The visible corners of the glasses will be sanded and the seams between the glasses will either be left open or filled with silicone if needed.

Doors

With our full glass wall, you won't need to bargain for the door alternatives. You can choose as a door either sliding-, hinge or turning door. Also from us you will get the door automatism, entrance systems and all of the needed hinges, shutters and locks.

HSL aluminum framed glass walls

Aluminum gives the partition walls a unique look. The perks of HSL aluminum framed glass wall are a really level quality of work, precise sizing and a large selection of surface alternatives. Explore more closely.

Aluminum framed partition wall is designed and made from 34x38mm aluminum profile with elements in the shape and size of your wish. Also the dividing will be done exactly in the way you need them. The elements are also really easy to install and effortless to move with the change of the space needs.

Sliding doors are usually installed on the aluminum walls, but also turning-, and hinge doors are possible. The aluminum profiles are available anodized to natural color or powder painted in accordance with the RAL color chart.

Aluminum profiles are also available in decoral treated, where the profile is powder painted in accordance with the RAL color chart, and it's coated with wood grain pattern. There are multiple different shades of wood available in the selection.

For the sliding doors options, found tested structures are in the values of R_w33dB ja R_w37dB . The glasses are always chosen according to the requirements of the project.

HSL wood framed glass walls

The combination of wood and glass is one of the most popular partition wall materials. And to no surprise, because with the combination can be achieved a stylish partition wall solution, that is suitable for any space.

HSL Wood framed glass wall is module structured, it has two benefits: The wall is easy to install and move in case it's needed. The modules width's and height's can be measured according to your wish. Modules are commonly made from a 30x92 sized MDF-, wood- or plywood profile or according to your special wishes. The profile can be painted or, for example, coated with a veneer.

HSL DIM GLASS electrochromic glass walls

By equipping your space with HSL smart glass walls you will create bright and practical spaces, in which you can according to the need, dim and clear the glasses with one push of a button. Electrically dimmable smart glass is a remarkably more stylish, practical and also cheaper than an integrated venetian blind that is between two glasses. The impressive solution will also stay in the minds of the people visiting the space.

The smart glass wall stops effectively the radiation of the sun, and guarantees the desired inner environments despite the season. The laminated glass also increases safety because of it's shockproof structure.

Smart glass walls are made in the wall system elements of the shapes and sizes of your wishes. You will also get the dividing exactly in the way you need it, taking into account the maximum sizes of the glass wall (1800mm x 4000mm). The elements are easy to install, and effortless to move with the changes in the needs of the space.
